DOOR COLLECTION

ANTIBACTERIAL PROTECTION

Invisible to the naked eyes, harmful bacteria are present everywhere in the biosphere. Some of these bacteria can also be Superbugs, which are usually very difficult to destroy. Bacteria can influence human physiology, alter human thinking, cause allergies and can sometimes lead to serious life threatening diseases. Most of the time, prevention is a better cure for bacteria as once infected, it very difficult to destroy the bacteria. Due to this reason, Greenlam® incorporates a US-EPA anti-microbial agent during the manufacturing of its laminates, which inhibits the growth of most common bacteria. This initiative highlights our commitment to people's health and the environment.

Our laminates have been tested to provide resistance towards the following micro-organisms:

- Staphylococcus aureus (ATCC 6538P)
- Escherichia coli (ATCC 8739)
- Haemophilus influenza (ATCC 10211)
- Staphylococcus epidermidis (ATCC 12228)
- Klebsiella pneumoniae (ATCC 4352)
- Salmonella typhimurium (ATCC 14028)
- Staphylococcus aureus subsp. aureus (ATCC 6538)
- Methicillin-resistant Staphylococcus aureus (NCTC 12493)
- Enterococcus faecalis (ATCC 29212)
- Streptococcus pneumoniae (ATCC 10015)
- Candida albicans (ATCC 10231)
- Bacillus subtilis (ATCC 6633)
- Pseudomonas aeruginosa (ATCC 15442)

ENVIRONMENTAL PROTECTION

The mark of responsible forestry

Greenlam® has earned the Forest Stewardship Council® (FSC®) Chain of Custody certification, one of the world's leading FSC® certifiers and one of FSC's founding members. FSC® provides third-party certification confirming that materials sold as FSC® certified are harvested from well-managed forest operations.

Today, all Greenlam® HPL Laminates are FSC-certified.

GREENGUARD Certification Program

Greenlam® Laminates are classified under the Low Emitting Product category by the GREENGUARD standards, meaning that harmful pollutants in the air are suppressed to the lowest levels. This is an assurance that our products are suitable for use in office environments and other indoor spaces, and promote a healthier environment in these areas.

GREENGUARD Gold Certification

This certification, with a stricter criteria, means that GREENLAM® products are suitable for use in environments where children spend significant periods of time, including schools and healthcare facilities.

PRODUCT RANGE

Presenting you GREENLAM® DOOR COLLECTION.

Greenlam's door range is composed of 28 vibrant Solid Colour decors and 14 extraordinary Woodgrain decors. All these 42 decors of High Pressure Laminate (HPL) are available in 2160 mm x 940 mm. All these laminates are readily available at our local warehouse and can be ordered from our UK office and our distributor for immediate delivery.

Our door range comes with a Suede texture; a hard exterior finish with a slight sheen. All of our door decors are available in fire retardant grade on request.

As a result of our continuous approach to surface materials, Greenlam's door range is also available as Unicore in 2440 mm x 1220 mm x 1.2mm. Unicore Laminates are produced by using design paper impregnated with melamine resin in a uniform colour throughout its construction, Unicore overcomes the issue of darker edges, caused by kraft paper layers associated with normal high pressure laminate. Beauty of Unicore lies in it's seamless finish in the final product.

Greenlam has launched the stunning HD Gloss premium decorative laminates, bringing high-shine looks with added toughness. The introduction of HD Gloss gives the opportunity to introduce a superior gloss surface in a range of environments with the confidence that it will continue to look good in even the busiest locations. Featuring MAR resistance for protection against micro scratches, HD Gloss keeps shining for longer and comes with antibacterial features. HD Gloss is available in 2150 mm x 940 mm.
